Capstone Project

Artificial Intelligence (AI) Usage Report

FULL NAME: Erica Gyamfuaa Fordjour

STUDENT ID: WTS/2026/169

LEARNING TRACK: Cybersecurity

INDUSTRY TYPE: Education (University)

INDUSTRY NAME: Rexmi State University (RSU)

PROJECT TITLE:

INVESTIGATION OF A RANSOMWARE ATTACK CAUSED BY PHISHING ON A UNIVERSITY LEARNING MANAGEMENT SYSTEM.

1. Artificial Intelligence (AI) Tools Utilized

• Tool Name: Claude AI and Google Gemini AI
• Type of Tool: Generative AI/ research and analysis assistant
• Access Method: web-based interface
• Frequency of Use: moderate

Claude AI and Google Gemini AI was the only AI tool used to assist with analysis, drafting and summary which was reviewed and tailored to my preference. All AI tools used has been fully disclosed above.

2. Purpose of Usage

Claude AI was used for the following tasks to assist with analysis and drafting of the project which was reviewed and changed to my preference.

Task 1: Log dataset generation and analysis. After describing the incident process to Claude AI, I prompted it to create a realistic log dataset consisting of the sources of logs such as Auth, Firewall, System, and Webserver. Claude created the set of log and I analyzed the log line by line, and I personally made changes to it to fit my preference.

Task 2: MITRE ATT&CK technique mapping. I provided Claude AI with all of the incident information along with the timeline of events. Claude produced recommended techniques from MITRE ATT&CK based on the various stages, tactics and techniques of the attack. I then confirmed each of them from the MITRE ATT&CK website which some were wrong, hence I corrected it before including it in my report.

Task 3: Document Drafting and Research summarization. Claude AI was used to draft and summarize the problem statement, background & context and the conclusion of the problem statement report from the main project document.

Task 4: Image Generation. Gemini AI was used to generate images that were used in the PowerPoint presentation.

3. Scope of AI Assistance

Usage Area	Percentage of Usage
Code generation assistance	0%
Debugging support	0%
Research summarization	40%
Documentation drafting	50%
Design ideation	50%
Architecture planning	30%

Ethical and Responsible Use Declaration

By submitting this report, I confirm that:

- All Artificial Intelligence tools used during the development of this Capstone Project have been fully and accurately disclosed.
- No plagiarism, unauthorized copying, or misrepresentation of authorship has occurred.
- No confidential, private, or sensitive data was improperly shared with external AI tools.

I acknowledge that any intentional misrepresentation of AI usage or authorship may result in further review by the Instructional Design team.

Confirmation

By entering my name below, I affirm that this declaration is accurate and truthful.
